ACTIVITY TOWER

Product description

This is a large and diverse playground set that is bound to inspire all children. A lower (870 mm) and a higher (1,470 mm) tower make it exciting, and various different climbing elements work together to diversely develop the children's motor skills. The steps, tunnel and slide are suitable for safe sliding by the youngest ones. The taller tower can also be accessed by a rung net, curved climbing frame with net or a curved ladder, or via the smaller tower and the exhilarating descent at high speed is via the slide or a fireman's pole. There is a fun board bridge and rung bridge for safe passage between the towers. Beneath the tower equipment there are labyrinth and roulette walls as well as four seats for having a rest when necessary.

The frame top is made of laminate and pine. Made of laminate with a beautiful texture, the walls have small window panes for children to peek through. The nets are wrought from durable, coated steel cables. Cruciform stainless steel joints keep the crossings firmly in place, protecting the fabric against wear. The steps of the rung bridge are clearly distinguishable from the safety surface, which contributes to general safety.
