

Design **Katrin Soans**

**PIANO** on modernse ja minimalistliku disainiga büroomööbliseeria, kus on palju võimalusi erineva funktsionaalsusega töökohtade moodustamiseks. Lauaplaatide karkassivalik võimaldab vastavalt vajadusele kombineerida erinevas kõrguses reguleeritavusega töölaudu. U-jalaraamil töölaudade kõrgus on mehhaaniliselt muudetav vahemikus 650 – 850 mm. T-jalaraamil elektriliselt reguleeritavaid laudu on lihtne laua küljes oleva puldi abil reguleerida kõrgusele 610 – 1260 mm. Lisaks on ka statsionaarse 740 mm kõrgusega laudu. Avad tööpindades võimaldavad erinevaid funktsionaalseid lahendusi, sealhulgas elektri- ja võrguühenduse toomist lauapinnale.

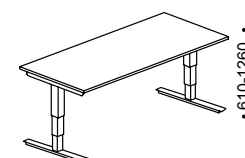

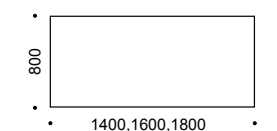

**PIANO** is an office furniture range with a contemporary minimalist design. It offers plenty of opportunities for creating workstations with different functions. The choice of leg-frames allows you to combine different desktop heights depending on your needs. The desks supported by a U-shape leg-frame offer mechanical height adjustment between 650 and 850 mm. The desks with a T-shape leg-frame are electrically height-adjustable between 610 and 1260 mm, with the help of a switch attached to the desk. The range also includes desks with a fixed height of 740 mm. The holes in the desktops allow various functional solutions and can be used for routing power and network cables, for example.

**PIANO** – это серия мебели, выполненная в современном минималистском стиле и дающая большое количество возможностей для создания рабочих мест различной функциональности. Выбор каркасов для столешниц позволяет в соответствии с необходимостью комбинировать рабочие столы, регулируемые по высоте. Высота рабочих столов с ножками, выполненными в форме буквы U, регулируется механическим способом от 650 до 850 мм. Столы с ножками в форме буквы Т и с электрической регулировкой можно отрегулировать с помощью имеющегося сбоку пульта на высоту от 610 до 1260 мм. Имеются также столы со стационарной высотой 740 мм. Отверстия в рабочей поверхности позволяют использовать различные функциональные решения, в том числе выводить на стол электрические и сетевые соединения.
