### Product description

Anton is a playground product for small children and it belongs to the ABC product family. It consists of steps to a low (570 mm high) platform and a shallow slide. By the side of the platform there is a small tabletop for playing on. One face of the tabletop has a car-racing track and the other a play stove. The visible face must be chosen on installation, but the tabletop can easily be flipped over at a later stage. The tabletop is strong enough for an adult to sit on, to assist a toddler on the slide. Beneath the table is a round peephole. On the side of the slide there is a turning disc that reveals small pictures. The littlest ones will be interested in the bright colours, contrasts and fun details, which contribute safely to their motor development.

1 tower (+570 mm), slide (+570 mm), stairs, play table, peephole, peephole pictures

Accessory: Sound floor for ABC 60M, Product number 200420
